VALENTINO

Surface-mounted battery-powered code lock

BATTERY-POWERED ELECTRONIC CODE LOCK

The Valentino is the high quality battery-powered electronic code lock with aluminium housing. Valentino's energy efficient design makes it very easy to equip any gate with access control, with a minimal need for maintenance. Pin codes can be easily added, modified or removed. The 13/16" continuous adjustability of the bolts allows a perfect latching and locking of the mechanism.

Valentino is recommended for use in multiple applications, including ornamental steel, ornamental aluminum, concrete, and galvanized steel. Ideal industries for the Valentino include power plants or energy plants, sports stadiums, amusement parks, schools, residential and commercial or industrial areas.

- Operational code panel on both sides
- Option to create different codes for both entrance and exit
- Equipped with aluminum dust and rain covers
- Easy and fast set-up & access code modification
- Adjustable rollerbolt offers easy closing
- Mechanism is user-friendly
- Automatic code reset after opening by means of handle
- Anti-code detection with integrated security press plate
- Cylinder dust cover available (optional)
